

MEGA evaluations for the preparation of REACH exposure scenarios for chromium(VI) compounds (2000 to 2009) in Germany

1 Introduction

The measured data for workplace exposure evaluated in the following have been gathered and documented in accordance with the principles of the measurement system of the German social accident insurance institutions for exposure assessment (MGU¹, formerly BGMG). The quality of the MGU is upheld by a quality management system that in essence satisfies the requirements of DIN EN ISO 9001. The test laboratories are operated in accordance with DIN EN ISO 17025 "General requirements for the competence of testing and calibration laboratories".

To measure chromium(VI) exposure at the workplace, a defined volume of air is sucked by a suitable pump through the sampling system fitted with a quartz fibre filter. The chromium(VI) compounds contained in the air are intercepted by the quartz fibre filter. Quantitative analysis is performed with the aid of calibration curves, with the chromate concentration being plotted against extinction (measured at 540 nm). All concentrations of chromium(VI) compounds are calculated as chromium trioxide, CrO₃. The quantification limits (as of 01.01.2010) are 0.005 mg/m³ for a test air volume of 0.42 m³ (personal measurement) and 0.0001 mg/m³ for a test air volume of 45 m³ (stationary measurement). Source: Chromium (ref. no. 6665). In: IFA-Arbeitsmappe Messung von Gefahrstoffen. 37. Lfg. X/2006. Ed.: Deutsche Gesetzliche Unfallversicherung (DGUV), Berlin. Erich Schmidt, Berlin 2011 – loose-leaf edition.

With consideration given to data security, the principles for the statistical evaluation of the data gathered in the MGU are governed by an administrative agreement between the accident insurance institutions (AII's) and the German Social Accident Insurance (DGUV). The process ensures that it is not possible to trace the identity of an insured firm or of an AII; the measured values concerned are otherwise disregarded.

All the surveyed data in the MGU are brought together in the MEGA exposure database (measured data on exposure to hazardous substances at the workplace). If individual values fall below the measurement method's analytical quantification limit, half the value is adopted in the evaluation. The MEGA^{Pro} software developed by the IFA (formerly BGIA) makes it possible to statistically analyse the data of the MEGA exposure database on the basis of various selection criteria and evaluation strategies.

2 Data situation and evaluation strategy

2.1 Overview of the measured values collected in the MGU, data period 2000 to 2009

		Number of measured values		Number of measured values
Measured values in data period 2000 to 2009	Measured values with reference to exposure:	4583	Thereof below the analytical quantification limit (< AQL):	2996
Sampling	Personal:	2375	Stationary:	2208
Sampling time	≥ 1 h:	4318		
Exposure time	≥ 6 h:	4092	≥ 8 h:	4009
Local exhaust ventilation	No:	1190	Yes:	2952
Action to prevent emission	No:	2854	Yes:	324

2.2 Criteria for inclusion of measured data in the evaluation

- Measured data relating to exposure
- Sampling time ≥ 1 hour
- Exposure time ≥ 6 hours
- Data groups comprising fewer than ten measured data or measured data from fewer than three different accident insurance institutions or from fewer than five different firms are not evaluated (administrative agreement between the accident insurance institutions and DGUV for the purpose of data security).

2.3 Evaluation strategy

- The evaluation was performed on the basis of industry groups (Section 4) and work area groups (Section 5) and broken down further according to type of sampling (stationary or personal) and presence of a local exhaust ventilation device.
- The most important industry group (metalworking and machine manufacture) and the most important work area groups (surface treatment and coating, welding) are considered separately in the same way (Sections 4.4ff and 5.4ff).
- Section 6 then presents overviews showing the distribution of measured data among industries and industry groups as well as among work areas and work area groups.

3 Abbreviations and indices

The following abbreviations and indices are used in the evaluation tables:

AQL	analytical quantification limit
Number < values	number of measured values below the analytical quantification limit
Arithm. mean	arithmetic mean
SD	arithmetic standard deviation
Geom. mean	geometric mean
GSD	geometric standard deviation
!	The number of measured values below the analytical quantification limit (AQL) is greater than the number of measured values represented by this cumulative frequency value. No concentration is therefore given for this cumulative frequency value.
+	The distribution value is below the largest analytical quantification limit in the data set.

4 Industry groups

4.1 Industry groups (Concentrations of chromium(VI) compounds are calculated as chromium trioxide, CrO₃)

Industry group	Number of measured data	Number of firms	Number < values	Arithm. mean (mg/m ³)	SD	Geom. mean (mg/m ³)	GSD	50 percentile (mg/m ³)	75 percentile (mg/m ³)	90 percentile (mg/m ³)	95 percentile (mg/m ³)
Total	3755	1458	2535	0.014	0.137	0.00243	4.928	AQL !	0.0027 +	0.015 +	0.0352 +

6 Overviews

6.1 Distribution of the measured values of industry groups among industries (n > 9)

Industry group	Industry	Measured values
Construction	Plant and equipment construction (metal)	34
Construction	Container construction	19
Construction	Pipeline construction	16
Construction	Heating, air conditioning, ventilation engineering	15
Chemical industry	Chemical industry	31
Electrical engineering, fine mechanics, optics	Electrical engineering, general	84
Electrical engineering, fine mechanics, optics	Manufacture of hardware, sheet metal and metalware products	57
Wood and paper	Processing and treatment of wood	155
Ceramics	Manufacture of sanitary, technical and chemical-technical electrical ceramic	27
Plastic industry	Plastics and plastic foam, processing	13
Processing metals/Mechanical engineering	Electroplating	1039
Processing metals/Mechanical engineering	Processing and treatment of metals, general	774
Processing metals/Mechanical engineering	Mechanical engineering	272
Processing metals/Mechanical engineering	Apparatus engineering	123
Processing metals/Mechanical engineering	Surface treatment and hardening	100

Industry group	Industry	Measured values
Processing metals/Mechanical engineering	Vehicle construction	99
Processing metals/Mechanical engineering	Manufacture of machinery and vehicles, general	83
Processing metals/Mechanical engineering	Processing of liquid coating materials (liquid varnish coating)	71
Processing metals/Mechanical engineering	Plant engineering and construction, construction of plants	69
Processing metals/Mechanical engineering	Electroplating, manually fed line	54
Processing metals/Mechanical engineering	Electroplating, automatic rack/barrel lines	52
Processing metals/Mechanical engineering	Manufacture of taps and valves	36
Processing metals/Mechanical engineering	Steel construction	36
Processing metals/Mechanical engineering	Electroplating, manually operated rack/barrel line	28
Processing metals/Mechanical engineering	Steel and light metal construction	21
Processing metals/Mechanical engineering	Manufacture of parts for motor vehicles and engines (automotive supply)	18
Processing metals/Mechanical engineering	Manufacture of aircraft	17
Processing metals/Mechanical engineering	Repair shop for machinery	15
Processing metals/Mechanical engineering	Metalworking	13
Processing metals/Mechanical engineering	Repair shop (service shop), general	13
Processing metals/Mechanical engineering	Shipbuilding	10
Processing metals/Mechanical engineering	Grinding shop (metal products)	10
Processing metals/Mechanical engineering	Drop forges	10

Industry group	Industry	Measured values
Manufacture of metals	Iron and steel foundry, mixed	24
Manufacture of metals	Steel foundry	21
Manufacture of metals	Iron foundry	15
Transport	Transport, shipping, transport companies and similar	10

6.2 Distribution of the measured values of the work area groups among work areas ($n > 9$)

The work areas of the surface treatment, surface coating and welding groups are evaluated separately (see above).

Work area group	Work area	Measured values
Drilling, grinding, punching	Drilling	18
Installation	Installation, general	29
Polishing	Polishing systems	12
Polishing	Polishing	14
Repair and maintenance	Repair and maintenance, in workshop	11
Sawing	Sawing	93
Sanding	Sanding	146
Sanding	Dry sanding	32
Cutting (varous methods)	Blowtorch cutting	19
Cutting (varous methods)	Laser beam cutting	80
Cutting (varous methods)	Plasma smelt cutting, with machines	32
Cutting (varous methods)	Plasma-cutting, general	36
Spraying AirMixLess	Surface coating, spraying (e.g. with pressurised air)	21
Spraying AirMixLess	Workshop rooms, spraying station without special precautions, airless, manual	35
Separating and processing methods	Separating and processing methods, room	11
No assignment to group	Processing, room	31

Work area group	Work area	Measured values
No assignment to group	Staining	17
No assignment to group	Spark erosion	11
No assignment to group	Boiler pressure impregnation	15
No assignment to group	Stationary machines for machining, room, sanding and polishing machines for wood	12
No assignment to group	Control/operating station	12
No assignment to group	Air blasting systems, dry, closed	12
No assignment to group	Technical school, at facilities	13

6.3 Distribution of the measured values of the work area groups among industry groups (n > 9)

Work area group	Industry group	Measured values
Drilling, grinding, punching	Processing metals/Mechanical engineering	26
Casting, smelting	Manufacture of metals	13
Foundries (various work areas)	Manufacture of metals	18
Mixing	Chemical industry	14
Installation	Processing metals/Mechanical engineering	19
Surface treatment, surface coating	Electrical engineering, fine mechanics, optics	32
Surface treatment, surface coating	Ceramics	27
Surface treatment, surface coating	Processing metals/Mechanical engineering	1314
Polishing	Processing metals/Mechanical engineering	24
Repair and maintenance	Processing metals/Mechanical engineering	11
Sawing	Wood and paper	97
Sanding	Electrical engineering, fine mechanics, optics	15
Sanding	Processing metals/Mechanical engineering	154
Cutting (varous methods)	Processing metals/Mechanical engineering	148
Welding	Construction	73
Welding	Chemical industry	15
Welding	Electrical engineering, fine mechanics, optics	76

Work area group	Industry group	Measured values
Welding	Processing metals/Mechanical engineering	1009
Welding	Manufacture of metals	25
Spraying AirMixLess	Processing metals/Mechanical engineering	63
No assignment to group	Construction	15
No assignment to group	Electrical engineering, fine mechanics, optics	10
No assignment to group	Wood and paper	49
No assignment to group	Processing metals/Mechanical engineering	172
No assignment to group	Manufacture of metals	33

6.4 Distribution of the measured values of the work areas among industries (n > 9)

Work area	Industry group	Measured values
Loading and unloading station	Electroplating	26
Processing, room	Processing and treatment of wood	22
Coating, general	Electroplating	147
Coating, gloss chroming	Electroplating, automatic rack/barrel lines	12
Coating, gloss chroming	Electroplating, manually fed line	17
Coating, gloss chroming, mixed acid bath	Electroplating	12
Coating, gloss chroming, sulfuric acid bath	Electroplating	45
Coating, hard chroming	Electroplating, manually fed line	30
Coating, hard chroming	Electroplating, manually operated rack/barrel line	21
Coating, hard chroming, mixed acid bath	Electroplating	43
Coating, hard chroming, sulfuric acid bath	Electroplating	242
Coating, black chroming	Electroplating	21
Coating, chroming, general	Electroplating	158
Coating, finishing with noble metals, general	Electroplating	11
Coating, nickel-plating, general	Electroplating	10
Coating, galvanizing, general	Electroplating	30

Work area	Industry group	Measured values
Coating, galvanizing, acidic	Electroplating	15
Coating, galvanizing, acidic	Electroplating, automatic rack/barrel lines	11
Chromating	Electroplating	72
Flame spraying	Processing and treatment of metals, general	18
Laser welding	Processing and treatment of metals, general	18
Laser beam cutting	Mechanical engineering	17
Laser beam cutting	Processing and treatment of metals, general	41
Arc hand welding with covered pencil electrode	Apparatus engineering	11
Arc hand welding with covered pencil electrode	Processing and treatment of metals, general	24
Arc welding, mixed arc processes	Processing and treatment of metals, general	10
Metal active gas welding (MAG)	Apparatus engineering	31
Metal active gas welding (MAG)	Electrical engineering, general	11
Metal active gas welding (MAG)	Vehicle construction	59
Metal active gas welding (MAG)	Manufacture of machinery and vehicles, general	31
Metal active gas welding (MAG)	Mechanical engineering	54
Metal active gas welding (MAG)	Processing and treatment of metals, general	120
Metal active gas welding (MAG)	Steel construction	20
Metal inert gas welding (MIG)	Plant engineering and construction, construction of plants	15

Work area	Industry group	Measured values
Metal inert gas welding (MIG)	Vehicle construction	14
Metal inert gas welding (MIG)	Mechanical engineering	11
Metal inert gas welding (MIG)	Processing and treatment of metals, general	33
Surface treatment, general	Manufacture of sanitary, technical and chemical-technical electrical ceramic	25
Surface coating, electroplating	Electrical engineering, general	19
Surface coating, electroplating	Electroplating	64
Surface coating, electroplating	Mechanical engineering	11
Surface coating, electroplating	Processing and treatment of metals, general	28
Surface coating, electroplating	Surface treatment and hardening	36
Plasma-cutting, general	Processing and treatment of metals, general	17
Plasma welding	Processing and treatment of metals, general	15
Sawing	Processing and treatment of wood	85
Sanding	Mechanical engineering	24
Sanding	Processing and treatment of metals, general	60
Welding, general	Processing and treatment of metals, general	19
Stationary machines for machining, room, sanding and polishing machines for wood	Processing and treatment of wood	12
Technical school, at facilities	Processing and treatment of metals, general	10

Work area	Industry group	Measured values
Dry sanding	Processing and treatment of metals, general	12
Preliminary treatment, staining, chemical	Electroplating	17
Workshop rooms, spraying station without special precautions, airless, manual	Processing of liquid coating materials (liquid varnish coating)	35
Resistance spot welding	Processing and treatment of metals, general	14
Tungsten inert gas welding (TIG)	Plant and equipment construction (metal)	14
Tungsten inert gas welding (TIG)	Plant engineering and construction, construction of plants	22
Tungsten inert gas welding (TIG)	Apparatus engineering	31
Tungsten inert gas welding (TIG)	Manufacture of hardware, sheet metal and metalware products	11
Tungsten inert gas welding (TIG)	Electrical engineering, general	13
Tungsten inert gas welding (TIG)	Mechanical engineering	64
Tungsten inert gas welding (TIG)	Processing and treatment of metals, general	158
Tungsten inert gas welding (TIG)	Pipeline construction	10
