

A1	Project Code	IPA-99 Contract Biomonitoring
A2	Project Title	Biomonitoring of Exposure – Contract Exposure Assessment
A3	External Cooperation Partners	European Union Federal agencies Individual member companies of the Statutory Health Insurances Industry consortiums Non-for-Profit Research Institutes Universities
A4	Project Manager(s)	...dependent on the project

B1 – Aims
<ul style="list-style-type: none"> • Biomonitoring as part of health surveillance programs and according to the respective federal laws • Biomonitoring as part of (academic) research including population monitoring, and experimental studies in vivo and in vitro
B2 – Activities / Workplaces of Interest
All types of occupational and environmental exposure scenarios are of interest with particular focus on carcinogenic, mutagenic and reproductive toxicants, e.g., <ul style="list-style-type: none"> • Aromatic amines (AAs) • Diisocyanates • Metals and metalloids • Nicotine and its metabolites (Confounder Analyses) • Organic solvents • Organophosphorus compounds (crop protecting agents, flame retardants) (OPs) • Polycyclic aromatic hydrocarbons (PAHs) • Phthalates and phthalate substitutes • Volatile organic compounds (VOCs)
